Linux Training cheat sheet 3

Displays information file on a package

rpm –qpi [rpmPackage]

Lists out all installed packages

rpm –qpl

Installs specified package

rpm –i[vh] [rpmPackage]

Upgrades an installed with newer version

rpm –U[vh] [rpmPackage]

rpm –e [rpmPackage]

yum update

yum search [package_name]

yum info [package_name]

yum list installed

yum install [package]

yum remove [package]

yum autoremove [package]

yum reinstall [package]

systemctl list-unit-files

systemctl list-unit-files

systemctl list-dependincies [service]

systemctl status [service]

systemctl start [service]

systemctl stop [service]

systemctl enable [service]

systemctl disable [service]

#systemctl is-enabled [service]

systemctl is-active [service]

```
ll | grep "\<start"

ll | grep "end\>"

ll | grep "\<startend\>"

ll | grep "\<ab"

ll | grep "\<abc\+"

ll | grep "\<ab."

ll | grep "\<abc\{3,6\}"

ll | grep "abc\|abb"

ll | grep "ab[bc]"

ll | grep "\<start[[:digit:]]"

ll | grep "[[:alpha:]][[:space:]][[:alpha:]][[:space:]][[:alpha:]]"

ll | grep "file.[1-6]"

ll | grep "file\?[1-6]"

grep "unix" unix.txt

grep -c "unix" unix.txt

grep -ic "unix" unix.txt

cat unix.txt |  grep -vi "\?unix"
```
